Hydrofera**BLUE**®

A Suite of Powerful Products

Hydrofera Blue® provides wound care professionals with a suite of multifaceted, intuitive, and cost-effective products for a range of wound care needs.

With the same antibacterial and non-cytotoxic properties of its flagship CLASSIC® product, Hydrofera Blue® dressings are effective in all phases of the wound healing process.

Faster Healing. Less Cost.

In a retrospective study examining wound treatment data of more than 30,000 patients over a two-year period, Hydrofera Blue® dressings combined with an Advanced Wound Management Program showed faster healing times and lower treatment costs.¹

Compared¹ with other commonly used dressings on patients who were not on an advanced wound management program, Hydrofera Blue® delivered over a 50% reduction in healing time and a 75% reduction in nursing labor cost.

Now that's powerful wound care.

Restore the body's natural balance with *blue.*

Hydrofera Blue® Specialty Dressings

Hydrofera CLASSIC® offers specialty dressings for ostomy appliances and for tunneling applications, where the need to manage bioburden is always a priority.

Ostomy Dressing

No hydration
required

Ostomy Dressing characteristics

- A unique antibacterial wound dressing that can be used under Ostomy barriers
- Manages bioburden, which helps the body's own immune system restore bacterial balance
- Broad spectrum activity against a wide variety of bacteria and yeast commonly found in wounds

Tunnel Dressing

Hydrate
before use

Tunnel Dressing characteristics

- A unique antibacterial wound dressing that can be used for Sinus Tracks and Tunnels.
- Wicks bacteria-laden exudate, slough and debris out of the wound
- High tensile strength, easy one-piece removal

Hydrofera Blue READY®

Polyurethane (PU) Foam Dressings

Maintains a moist wound environment without the need for hydration and has a wear time of up to seven days, requiring fewer dressing changes.

No hydration
required

Wound characteristics

- Shallow wounds
- Moderate to heavy exudate
- Acute or Chronic Wounds

Clinical benefits

- Manages bioburden
- Safe, Non-cytotoxic
- Kills bacteria in the dressing
- Up to 7-day wear time

Broad-spectrum antibacterial protection

- Provided by two organic pigments, methylene blue and gentian violet
- Non-cytotoxic

Absorption

- Absorbs and retains bacteria-laden exudate

Waterproof film backing

Hydrofera Blue READY-Border®

Polyurethane (PU) Foam Dressings

Provides a perfect solution for secure wound protection and atraumatic dressing removal.

No hydration required

Perforated Silicone Adhesive Border

- Non-cytotoxic antibacterial protection
- Does not inhibit fibroblasts or growth factors
- Gentle silicone adhesive for atraumatic dressing changes

Secure fit for difficult-to-dress areas and mobility

Atraumatic removal

Wound characteristics

- Shallow wounds
- Moderate to heavy exudate
- Acute or Chronic Wounds

Clinical benefits

- Non-cytotoxic antibacterial protection
- Gentle silicone adhesive for atraumatic dressing changes
- Does not inhibit fibroblasts or growth factors²
- Kills bacteria in the dressing
- Up to 7-day wear time

Secure hold, yet gentle removal

Waterproof and breathable cover film

Intimate contact of foam with the wound bed provides excellent absorption and bioburden control

Hydrofera Blue TRANSFER[®]

Polyurethane (PU) Foam Dressings

Tackles wounds with higher exudate, managing absorption of the secretions while maintaining a moist wound bed.

No hydration required

Wound characteristics

- Shallow wounds
- Moderate to heavy exudate
- Acute or Chronic Wounds

Clinical benefits

- Manages bioburden
- Safe, Non-cytotoxic
- Kills bacteria in the dressing
- Up to 7-day wear time

Broad-spectrum antibacterial protection

Absorption

No film backing increases exudate management options

Exudate is transferred into secondary absorbent dressing

To apply, place TRANSFER[®] over the entire wound.
Apply absorptive cover dressing.
Can be used with compression wrap and total contact cast.

Hydrofera Blue CLASSIC®

Polyvinyl Alcohol (PVA) Foam Dressings

Hydrate
before use

Powerful Wicking

- Wicks bacteria laden exudate into the foam and away from the wound surface with natural negative pressure through capillary flow.

Edge Effect

- Multiple authors have noted resolution of rolled or epiboled wound edges with use of Hydrofera Blue CLASSIC® dressings.²⁻⁵

Granulating wound bed with epithelial cells on the edge

Debridement

- Example of devitalized tissue removed at dressing change.

The Safe, Non-Cytotoxic Choice

- Ideal for clinicians looking for an alternative to silver dressings
- Less expensive than many silver foam dressings⁵
- Compatible with Hyperbaric Oxygen Therapy (HBOT)
- Compatible with growth factors and enzymatic debriders

Wound characteristics

- Deep, tunneling or shallow
- With or without devitalized tissue/slough and debris
- Moderate to heavy exudate
- Infected or at risk of infection
- Acute or Chronic Wounds

Clinical benefits

- Continuous wicking, highly absorptive
- Safe, autolytic debridement
- Manages bioburden
- Safe, Non-cytotoxic
- Does not inhibit growth factors
- High tensile strength
