

# BRADSHAWJUNIOR™

## Fully Electric, Height-Adjustable Pediatric Bed

## Safe, Simple Sleep Positioning for Toddlers to Teens

The Bradshaw Junior is the smart choice for providers serving families who need clinical positioning without complex customization. Reimbursable under HCPCS E0329 and ideal for conditions like cerebral palsy, muscular dystrophy, and other non-behavioral needs, it delivers support and safety without bulk and high price tags, making it a go-to option for providers and families alike.

It's easy to deliver, quick to assemble and even easier to maintain, helping your team save time and reduce costs with every install. And with intuitive safety features, an easy-to-clean slat-deck frame and a warm oak finish that blends in at home, families love it too.

## Benefits & Features

### Clinical Functionality

Provides adjustable foot elevation and Reverse Trendelenburg positioning to support respiratory function, circulation, and pressure redistribution - plus an adjustable height range promotes transfer safety for caregivers

### Saves on Delivery & Setup

Ships on a single pallet, can be easily assembled, and mounts onto its own transport stand, making storage and moves quick and efficient; each section weighs under 44 lb.

### Safety & Security

Features a lockbox to prevent tampering with controls & side rails with two-stage locking mechanism

### Fewer Service Calls for Happier Customers

Simple, durable construction means fewer maintenance issues, reduced follow-ups & more satisfied end users

Mattress Included

## Operational Functions

Raise  
Backrest

Knee  
Break

Auto  
Contour

Variable  
Tilt

Variable  
Height
