### Lower Leg Length (LLL)

*Lower Leg Length is **measured from seat sling to the top rear of the footrest.** See Appendix on Page 7. A minimum 2" ground clearance is required below the footrest. If the selected configuration results in less than 2" of ground clearance the footrest will be raised to 2" ground clearance, which may alter the lower leg length measurement. Available lower leg length is dependent on frame selection including adapter spacers.*
